

Governor & No Waste Spindles

Product Overview

The Governor Tissue Dispensers are constructed of impact resistant ABS plastic. They feature anti-theft pins on the spindles to eliminate theft and waste. The spindle is under constant tension for controlled delivery.

The No-Waste Tissue Dispensers are constructed from impact resistant plastic and feature anti-theft pins. The tissue rolls half a revolution, then a rocking action returns the roll for the next sheet delivery. The No-Waste models can also be ordered as 'Free Turning' units by placing a "P" after the part number.
